

# Huy Pham

## Senior Blockchain Engineer

✉ hu.work.pham@gmail.com

📍 Vietnam

### Profile

Blockchain Developer with 5+ years of experience building secure, scalable, and production-ready decentralized applications. Specialized in Solidity, Ethereum, Polygon, and BSC, with hands-on expertise in smart contract development, crypto payment systems, and blockchain security best practices. Strong background in backend engineering (Node.js, PHP) enables seamless integration of blockchain solutions into full-stack systems. Passionate about designing transparent, automated financial systems that reduce disputes and enhance user trust.

### Languages

English 

### Education

#### Bachelor's Degree

Ho Chi Minh City University of Technology

09/2011 – 03/2015

### Interests

Reading, Football, Painting

### Professional Experience

#### Senior Blockchain Developer

Nexxt Ideas

04/2022 – 08/2025 | Canada

- Designed and implemented secure crypto payment systems for rent and deposit management, enabling multi-currency support (ETH, USDT, BNB, MATIC).
- Developed smart contracts in Solidity to automate rental agreements and deposit escrow, ensuring transparency and reducing disputes.
- Optimized gas fees and transaction speeds through contract refactoring and Layer-2 scaling solutions (Polygon).
- Collaborated with backend/frontend teams to integrate blockchain payment APIs with existing SaaS platforms.

#### Blockchain Developer

Devot

09/2018 – 03/2022 | Croatia

- Built decentralized applications (dApps) with Ethereum and BSC, focusing on payment automation and token transfers.
- Created custom ERC-20 and ERC-721 tokens, including staking and reward mechanisms.
- Implemented secure wallet integrations using Web3.js and Ethers.js.
- Participated in technical planning for multi-chain deployments, enhancing flexibility and user adoption.

#### Software Engineer

Implex

05/2015 – 08/2018 | Poland

- Developed backend services with Node.js and PHP for fintech and SaaS platforms.
- Designed API-first architectures to support future blockchain integrations.
- Gained early exposure to blockchain projects, contributing to a proof-of-concept escrow payment system.

### Skills

#### Blockchain

Solidity, Ethereum, Polygon, Web3.js, Ethers.js

#### Frontend

React, Next.js, TypeScript, JavaScript, Angular, Vue.js, MUI

#### Backend

Rust, Node.js, Nest.js, Express.js, Python

#### Database

PostgreSQL, MySQL, MongoDB, Firebase

#### Testing & QA

Lighthouse, BrowserStack, QA Scripts, Unit Testing

#### Workflow

Agile, Scrum, Jira, Slack

#### Performance Optimization

Core Web Vitals, Lazy Loading, SEO Best Practices
