

Huy Pham

Senior Frontend Engineer

✉ hu.work.pham@gmail.com

📍 Vietnam

Profile

Senior Frontend Engineer with 9+ years of experience building modern, responsive, high-performance web applications. Specialized in React, Next.js, and scalable UI architectures with strong experience integrating .NET Core backends. Adept at leading frontend initiatives, collaborating with product and full-stack teams, and transforming UI/UX designs into polished, production-ready experiences. Strong communicator, excellent with cross-team planning, and comfortable working in fast-paced or hybrid environments.

Languages

English

Education

Bachelor's Degree

Ho Chi Minh City University of Technology

09/2011 – 03/2015

Interests

Reading, Football, Painting

Professional Experience

Senior Frontend Developer

Nexxt Ideas

04/2022 – 08/2025 | Canada

- Led frontend development across multiple platforms, delivering high-performance React and Next.js applications with clean architecture and reusable UI components.
- Collaborated directly with UI/UX designers to transform complex interfaces into responsive, mobile-friendly layouts, ensuring pixel-perfect quality.
- Integrated React frontends with .NET Core and Node.js backends, designing efficient API consumption layers and improving application reliability.
- Modernized legacy UI modules by migrating them to React and Next.js, improving loading times, SEO compatibility, and developer experience.
- Worked closely with product managers to define feature requirements, estimate workloads, and execute iterative releases.
- Established coding standards, frontend best practices, and review workflows that improved maintainability and reduced UI defects.
- Designed internal tools and dashboards that enhanced data visibility, improved user workflows, and contributed to platform-wide UI consistency.
- Ensured cross-browser compatibility, accessibility compliance, and performance optimization using modern tooling and techniques.

Senior Frontend Engineer

Devot

09/2018 – 03/2022 | Croatia

- Built responsive, modular, and component-driven React applications integrated with REST APIs and backend services.
- Created UI components using HTML5, CSS3, Bootstrap, and custom styling while ensuring seamless functionality across mobile and desktop devices.
- Worked closely with full-stack teams to integrate UI with .NET Core and Node.js endpoints, improving request flows and API usage patterns.
- Introduced frontend performance improvements through code splitting, lazy loading, and optimized rendering strategies.
- Maintained high-quality Git workflows, managing feature branches, code reviews, and merge pipelines for smooth team collaboration.
- Developed internal libraries and utilities to simplify form handling, validation, state management, and API communication.
- Participated in Agile planning, producing accurate estimates and delivering new UI features in predictable cycles.
- Supported UX enhancements by gathering feedback, identifying UI bottlenecks, and implementing improvements quickly.

Software Engineer

Implex

05/2015 – 08/2018 | Poland

- Built interactive UI features using React, JavaScript, jQuery, and modern frontend technologies.
- Collaborated with .NET Core developers to integrate front-end interfaces with backend services and ensure strong data flow reliability.
- Converted designer-provided mockups into fast, responsive, and cross-browser compatible web pages.

- Assisted in migrating older jQuery-based modules into React components to enhance maintainability and performance.
- Improved CSS architecture using modular SCSS, component-based styling, and reusable layouts.
- Strengthened API integration workflows by implementing proper error handling, caching mechanisms, and optimistic UI patterns.
- Contributed to code reviews, testing cycles, and documentation improvements to ensure consistent frontend quality.
- Worked in multi-disciplinary teams to align UI design, backend logic, and business requirements.

Skills

Frontend

React, Next.js, JavaScript/TypeScript, HTML5, CSS3, Bootstrap, Tailwind, jQuery

Backend Collaboration

REST APIs, C#, .NET Core, microservices

Cloud & DevOps

AWS (Lambda, S3, EC2, RDS), Docker, CI/CD (GitHub Actions, Jenkins)

System Design

Distributed Systems, Event-Driven Architectures, Message Queues (Kafka, NATS)

Testing & Quality

Unit & Integration Testing, Go Test, RSpec, GitHub Actions, Jenkins

Tools & Platforms

Grafana, Prometheus, Nginx, RESTful & GraphQL APIs

Webmaster Tools

Google Search Console, Google Analytics, SEO Tools

Software Quality

TDD, integration tests, load testing, fuzzing, secure coding

Soft Skills

Technical leadership, cross-functional collaboration, deep dives, mentoring
