

Huy Pham

Senior Mobile Engineer

✉ hu.work.pham@gmail.com

📍 Vietnam

Profile

Innovative Senior Mobile Engineer with over 5 years of experience building high-performance, cross-platform and native mobile applications for Android and iOS using React Native, Flutter, Swift, and Kotlin. Proven track record of delivering scalable, visually refined, and AI-integrated applications across multiple domains including health tech, education, and finance. Skilled in implementing mobile UI/UX best practices, optimizing app performance, and integrating AI-driven features such as chatbots, voice recognition, and recommendation engines. Adept at collaborating across multidisciplinary teams and delivering robust, user-centric solutions in fast-paced environments aligned with the Pacific Time Zone.

Languages

English

Education

Bachelor's Degree

Ho Chi Minh City University of Technology

09/2011 – 03/2015

Interests

Reading, Football, Painting

Professional Experience

Senior Mobile Developer

Nexxt Ideas

04/2022 – 08/2025 | Canada

- Led design and development of cross-platform mobile applications for healthcare and logistics clients, focusing on scalability and performance across iOS and Android.
- Built and maintained hybrid apps using React Native and Flutter, ensuring seamless user experience and consistent UI components.
- Integrated AI-driven features such as intelligent recommendations and chat automation via TensorFlow Lite and OpenAI API.
- Collaborated with designers to ensure compliance with Material and Cupertino design standards, achieving pixel-perfect UI results.
- Implemented CI/CD pipelines for automatic builds, testing, and deployment to App Store and Play Store.
- Optimized app startup times and reduced bundle size by 35% through modularization and asset optimization.
- Participated in code reviews, mentored junior developers, and enforced clean architecture and best coding practices.
- Worked remotely within the Pacific Time Zone, ensuring real-time collaboration with cross-continental teams.

Mobile Engineer

Devot

09/2018 – 03/2022 | Croatia

- Developed AI-powered educational and productivity apps using Flutter and React Native, handling data synchronization and offline functionality.
- Implemented machine learning integrations such as text recognition, predictive typing, and sentiment analysis through Core ML and TensorFlow Lite.
- Designed robust app architectures (MVVM, Redux) to ensure scalability and maintainability.
- Collaborated with backend teams to build RESTful and GraphQL APIs supporting real-time data sync.
- Led the transition of existing native apps (Swift/Kotlin) into unified cross-platform architectures, cutting maintenance costs by 40%.
- Performed extensive testing, debugging, and optimization to achieve 4.8+ ratings across app stores.
- Conducted A/B testing for new features, improving engagement and retention metrics.
- Documented mobile standards and promoted code reusability across multiple projects.

Software Engineer

Implex

05/2015 – 08/2018 | Poland

- Designed and developed native mobile apps using Swift (iOS) and Kotlin (Android) for fintech and e-commerce clients.
- Built reusable UI components following Apple Human Interface and Material Design guidelines.
- Integrated secure user authentication, payment gateways, and push notifications across platforms.
- Implemented advanced animations, gesture controls, and responsive layouts for enhanced UX.

- Collaborated with QA engineers to maintain stable app builds and reduce crash rates by 25%.
- Integrated backend services using Firebase, AWS Lambda, and REST APIs.
- Deployed and managed app releases on both Google Play and Apple App Store.
- Coordinated with international product owners and designers to deliver client-centric solutions on tight deadlines.

Skills

Mobile Frameworks

React Native, Flutter, Swift, Kotlin, Objective-C, Java

AI Integration

TensorFlow Lite, Core ML, Dialogflow, OpenAI APIs

Backend & APIs

Firebase, REST/GraphQL APIs, Node.js, AWS Amplify

DevOps & CI/CD

GitHub Actions, Jenkins, Azure DevOps, Docker, Bitbucket Pipelines

Database

PostgreSQL, MySQL, MongoDB, Firebase

Testing & QA

Lighthouse, BrowserStack, QA Scripts, Unit Testing

Workflow

Agile, Scrum, Jira, Slack

Performance Optimization

Core Web Vitals, Lazy Loading, SEO Best Practices
