

Huy Pham

Senior Full Stack Engineer

✉ hu.work.pham@gmail.com

📍 Vietnam

Profile

Senior Full-Stack Engineer with 9+ years building advanced, real-time, data-driven applications and modern AI-assisted user interfaces. Expert in React, Next.js App Router, Server Components, TypeScript (strict mode), shadcn, Radix, Tailwind, and Python/FastAPI. Specialized in developing conversational UX, agent-augmented systems, collaborative workspaces, and AI-aware UI behavior. Proven ability to design, implement, and optimize full-stack architectures with robust observability, error handling, and seamless integration across governed data systems. Highly experienced shipping end-to-end features: concept → architecture → implementation → instrumentation → iteration. Strong collaborator across AI Engineering, DevOps, and Platform teams.

Languages

English 

Education

Bachelor's Degree

Ho Chi Minh City University of Technology

09/2011 – 03/2015

Interests

Reading, Football, Painting

Professional Experience

Senior Full Stack Developer

Nexxt Ideas

04/2022 – 08/2025 | Canada

- Led development of AI-driven frontends and agentic dashboards using React, Next.js App Router, and TypeScript strict mode.
- Built conversational, interactive UIs allowing users to work with system intelligence rather than simple CRUD workflows.
- Developed real-time multi-user collaboration features (timelines, shared sessions, approvals) using WebSockets and event streams.
- Implemented complex agent orchestration flows with robust fallback logic, error surfacing, and user-friendly recovery behavior.
- Designed and maintained component libraries using shadcn, Radix, and Tailwind, ensuring a consistent, accessible design system.
- Integrated frontends with backend microservices and AI pipelines, improving cross-system reliability and performance.
- Contributed to system architecture, driving decisions on composability, data flows, observability, and production readiness.
- Implemented OpenTelemetry instrumentation at both UI and API boundaries for end-to-end traceability.

Senior Full Stack Engineer

Devot

09/2018 – 03/2022 | Croatia

- Built high-performance Next.js frontends with advanced reactive patterns and real-time updates.
- Developed Python/FastAPI services with async endpoints, Pydantic validation, and multi-service integrations.
- Implemented AI-enabled interaction layers for internal tools, enabling conversational data exploration vs. traditional dashboards.
- Integrated with data systems (Git, dbt pipelines, Fabric-like orchestrations) enabling governed workflows and auditability.
- Designed multi-user collaborative features (synchronized timelines, shared editing, role-based approvals).
- Created a unified design system using Tailwind + component libraries to streamline UI consistency across teams.
- Improved reliability with environment-specific fallbacks, retry policies, and automated error surfacing.
- Partnered with DevOps/Platform teams to ship production features with CI/CD pipelines and containerized deployments.

Software Engineer

Implex

05/2015 – 08/2018 | Poland

- Built modern JavaScript applications with React and scalable component patterns.
- Developed backend microservices with Python + Flask/FastAPI, focusing on async performance and API design.
- Shipped real-time features including collaborative editing, live dashboards, and event-based notifications.
- Implemented CI workflows, container deployments, and logs/metrics instrumentation.
- Collaborated closely with design and product to create fluid, intuitive UX for complex domains.

Skills

Frontend

React, Next.js, TypeScript, Tailwind CSS, HTML5/CSS3, component-driven architecture, performance optimization, real-time interfaces.

Backend

Python, FastAPI (async/await), Pydantic, Django, Flask

Database

PostgreSQL, MongoDB, Redis, DynamoDB, Pinecone, Chroma, pgvector

Cloud & DevOps

AWS (Lambda, S3, EC2, RDS), Docker, CI/CD (GitHub Actions, Jenkins)

System Design

Distributed Systems, Event-Driven Architectures, Message Queues (Kafka, NATS)

Testing & Quality

Unit & Integration Testing, Go Test, RSpec, GitHub Actions, Jenkins

Webmaster Tools

Google Search Console, Google Analytics, SEO Tools

Software Quality

TDD, integration tests, load testing, fuzzing, secure coding

Soft Skills

Technical leadership, cross-functional collaboration, deep dives, mentoring
