📍 Vietnam

Profile

Accomplished Lead Full Stack Engineer with 8+ years of experience delivering complex, high-traffic web platforms using Laravel, Vue.js, and modern PHP ecosystems. Expert in architecting scalable APIs, modular architectures, and clean software design following SOLID and DDD principles. Proven leadership in guiding cross-functional teams, conducting code reviews, and ensuring high coding standards and maintainability. Strong advocate of CI/CD automation, containerization (Docker), and performance optimization. Excellent communicator, fluent in English, with a record of delivering mission-critical software for international clients across SaaS, fintech, and e-commerce domains.

Languages

English 

Education

Bachelor's Degree

Ho Chi Minh City University of Technology

09/2011 – 03/2015

Interests

Reading, Football, Painting

Professional Experience

Senior Full Stack Developer

Nexxt Ideas

04/2022 – 08/2025 | Canada

- Lead end-to-end architecture and delivery of enterprise-grade web platforms for clients in e-commerce and logistics using Laravel and Vue.js.
- Defined and enforced SOLID principles, modular architecture, and separation of concerns across backend and frontend layers.
- Architected RESTful APIs and integrated them with Vue.js single-page applications using Axios and Vuex/Pinia for state management.
- Designed and optimized database schemas with Eloquent ORM and advanced SQL indexing, improving query performance by up to 40%.
- Implemented RBAC authentication and authorization systems using JWT, OAuth2, and API tokens to ensure data security.
- Led a team of 5 developers, conducted code reviews, and mentored mid-level engineers on best practices in testing and clean coding.
- Managed CI/CD pipelines using Docker and GitHub Actions, enabling automated deployments and zero-downtime releases.
- Worked directly with product owners to translate complex business needs into scalable technical solutions and ensured timely delivery.

Full Stack Developer

Devot

09/2018 – 03/2022 | Croatia

- Spearheaded development of SaaS platforms using Laravel 8+, Vue.js, and MySQL, supporting over 100K active users.
- Designed and maintained modular APIs and background job queues using Laravel Queues and Redis.
- Collaborated with cross-functional teams to develop scalable backend services, ensuring performance and maintainability.
- Built reusable Vue.js components, improving code reusability and reducing frontend delivery time by 25%.
- Integrated third-party APIs (Stripe, AWS S3, SendGrid) while ensuring secure token-based communication.
- Implemented Swagger/OpenAPI documentation, enhancing developer onboarding and API usability.
- Established unit testing pipelines with PHPUnit and Jest, increasing test coverage to 85%.
- Mentored junior developers, conducted weekly code reviews, and established internal coding guidelines and deployment workflows.

Software Engineer

Implex

05/2015 – 08/2018 | Poland

- Developed full-stack web applications using Laravel, Vue.js, and Bootstrap, handling both client and admin interfaces.
- Implemented Eloquent ORM relationships and optimized SQL queries for data-heavy dashboards.
- Built authentication and user management modules with RBAC and session-based security.
- Created responsive front-end layouts integrated with backend APIs for a seamless user experience.
- Deployed containerized environments using Docker for development and staging.

- Collaborated in Agile teams to deliver new product features on a bi-weekly release schedule.
- Wrote clean, maintainable code and participated in continuous improvement sessions to optimize system performance.
- Gained exposure to microservice architecture and cloud deployments on AWS EC2.

Skills

Frontend

Vue.js, React.js, TypeScript, Redux, Redux-Saga, React Query, Context API

Backend

PHP, Laravel, Symphony, Node.js, Express, Nest.js, Python, Flask

UI/UX & Design

Responsive Design, Figma Integration, CSS3, SCSS, Tailwind CSS, Ant Design, Material UI

DevOps & CI/CD

GitHub Actions, Jenkins, Azure DevOps, Docker, Bitbucket Pipelines

Database

PostgreSQL, MySQL, MongoDB, Firebase

Testing & QA

Lighthouse, BrowserStack, QA Scripts, Unit Testing

Workflow

Agile, Scrum, Jira, Slack

Performance Optimization

Core Web Vitals, Lazy Loading, SEO Best Practices
