

Pham Van Huy

Senior Full Stack Engineer

✉ hu.work.pham@gmail.com

📍 Hanoi, Vietnam

Professional Summary

Experienced Full Stack Engineer with 9+ years designing, building, and maintaining complex SaaS applications. Proficient in both front-end and back-end development, with strong expertise in JavaScript, Vue.js, .NET Core, C#, GraphQL, MongoDB, and Docker. Skilled in cloud platforms (AWS, Azure, GCP) for scalable architecture and Test-Driven Development (TDD) practices. Adept at Domain-Driven Design (DDD), high-traffic performance optimization, and ensuring web security and compliance. Collaborative team player with a passion for mentoring junior developers, delivering robust solutions, and continuously learning new technologies.

Languages

English	
German	

Education

Bachelor's Degree

Ho Chi Minh City University of Technology
09/2011 – 03/2015

Interests

Reading, Football, Painting

Work Experience

Senior Full Stack Developer

Nexxt Ideas

08/2022 – 11/2025

- Developed and maintained SaaS applications with Vue.js, .NET Core, C#, GraphQL, and MongoDB.
- Collaborated with product, design, and engineering teams to translate requirements into scalable, modular solutions.
- Implemented TDD practices with unit, integration, and functional tests to ensure code reliability.
- Optimized platform performance for high user traffic and large-scale data processing.
- Deployed and managed containerized applications using Docker on AWS/Azure.
- Mentored junior engineers, providing guidance on architecture, coding standards, and best practices.

Full Stack Engineer

Devot

09/2018 – 03/2022

- Designed and implemented full-stack features for complex SaaS products using JavaScript, Vue.js, .NET Core, and PostgreSQL.
- Improved backend API performance and optimized database queries for efficiency.
- Integrated secure authentication and authorization workflows, ensuring compliance with data security standards.
- Collaborated with cross-functional teams in an Agile environment, delivering features on tight schedules.
- Participated in code reviews and enforced best practices for scalable software development.

Software Engineer

Implex

03/2015 – 08/2018

- Contributed to front-end and back-end development of SaaS and internal tools.
- Built and optimized APIs and data layers, integrated third-party services, and implemented secure authentication.
- Assisted in cloud deployment using Docker and implemented monitoring and logging for high-availability systems.
- Collaborated closely with stakeholders to understand requirements and ensure smooth end-user experiences.

Skills

Frontend

Vue.js, React, Next.js, JavaScript/TypeScript, HTML5, CSS3, Bootstrap, Tailwind, jQuery

Backend

REST APIs, C#, .NET Core, microservices

Cloud & DevOps

AWS (Lambda, S3, EC2, RDS), Docker, CI/CD (GitHub Actions, Jenkins)

Databases

PostgreSQL, MongoDB, MySQL, DynamoDB, Firebase

System Design

Distributed Systems, Event-Driven Architectures, Message Queues (Kafka, NATS)

Testing & Quality

Unit & Integration Testing, Go Test, RSpec, GitHub Actions, Jenkins

Tools & Platforms

Grafana, Prometheus, Nginx, RESTful & GraphQL APIs

Webmaster Tools

Google Search Console, Google Analytics, SEO Tools

Soft Skills

Technical leadership, cross-functional collaboration, deep dives, mentoring
