📍 Vietnam

Profile

Creative and detail-oriented Front-End Developer with 6+ years of experience building visually stunning, responsive, and performance-optimized WordPress websites and JavaScript-driven user interfaces. Adept at custom theme and plugin development, translating Figma designs into pixel-perfect layouts, and delivering exceptional UX/UI experiences. Strong understanding of modern front-end frameworks (React, Tailwind CSS, Bootstrap), cross-browser optimization, and SEO best practices. Passionate about bridging creativity and technology — turning design concepts into elegant, high-performing digital experiences for global brands.

Reading, Football, Painting

Professional Experience

Senior Frontend Developer

Nexxt Ideas

04/2022 – 08/2025 | Canada

- Developed and maintained custom WordPress websites for creative and e-commerce clients, integrating custom themes, plugins, and WooCommerce solutions.
- Translated Figma and Adobe XD designs into responsive, dynamic, and cross-browser compatible front-end layouts.
- Implemented advanced JavaScript interactivity, improving user engagement by 45% through custom sliders, animations, and AJAX filtering.
- Collaborated closely with designers and back-end teams to ensure seamless API integrations and consistent branding across projects.
- Enhanced site performance using lazy loading, code splitting, and image optimization, achieving Lighthouse scores above 90 for most projects.
- Maintained WordPress security and updates, including plugin audits, database optimization, and site backups.
- Used Git version control and Agile workflow to coordinate across distributed teams and manage sprint deliverables.
- Mentored junior developers, reviewing pull requests and ensuring code followed W3C and WordPress coding standards.

Full Stack Developer

Devot

09/2018 – 03/2022 | Croatia

- Designed and implemented custom front-end components using React and integrated them within WordPress (Headless) environments.
- Built and customized WordPress themes, plugins, and shortcodes, ensuring flexibility and maintainability.
- Collaborated with designers to bring creative, design-led websites to life, incorporating micro-interactions and animations.
- Optimized websites for speed, SEO, and accessibility, leading to a 25% increase in organic traffic for key client sites.
- Integrated REST APIs and external services to deliver interactive dashboards and content widgets.
- Maintained WooCommerce stores, customizing checkout flows and improving product page performance.
- Conducted code reviews, testing, and debugging, ensuring stable production releases.
- Contributed to UI component libraries that standardized visual identity across multiple projects.

Software Engineer

Implex

05/2015 – 08/2018 | Poland

- Developed bespoke WordPress websites from scratch, implementing custom PHP, HTML5, CSS3, and JS functionalities.
- Collaborated directly with clients and designers to achieve pixel-perfect UI implementations.
- Managed plugin development and customization, including API integrations and performance enhancements.
- Utilized Bootstrap and Tailwind CSS for responsive grid systems and consistent design frameworks.

- Created reusable Gutenberg blocks and shortcodes, reducing project turnaround time by 30%.
- Managed full site lifecycle — from staging and testing to production deployment and maintenance.
- Ensured compliance with W3C standards, accessibility (WCAG 2.1), and SEO best practices.
- Maintained strong client relationships through clear communication and proactive design improvement suggestions.

Skills
